

Berikut semua yang perlu dijalankan setiap kali buka project, buka **3 terminal terpisah**:

Terminal 1 — Backend

powershell

```
cd d:\project\e-commerce\ecommerce-backend
```

```
npm run dev
```

Terminal 2 — Frontend

powershell

```
cd d:\project\e-commerce\ecommerce-frontend
```

```
npm run dev
```

Terminal 3 — Stripe Webhook Listener

powershell

```
stripe listen --forward-to localhost:5000/api/payment/webhook
```

Checklist singkat sebelum mulai:

#	Yang dijalankan	Keterangan
1	Backend (npm run dev)	Port 5000
2	Frontend (npm run dev)	Port 3000
3	stripe listen ...	Webhook otomatis PAID

Urutan: Backend dulu → baru Frontend → baru Stripe listener. Stripe listener harus tetap **running** selama development, jangan ditutup.
